

Chit testfile #86

The goal of this test is to
Grayscale objects set to overprint inside trim box

Following testelement errors are included and should be captured by the
reference software

enfocus.com

The red rectangle on the right contains a grayscale object that lies partly inside and partly outside of the trim box with a fill and stroke set to overprint.

When tested with the MagazineAds_v4, following errors & warnings are found by the reference software (Enfocus Pitstop).

PitStop 7 Professional

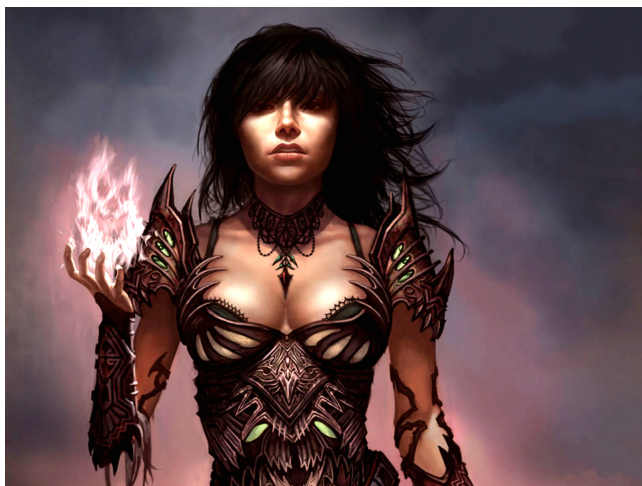

Preflight Report

Warnings

Colourspace gray is not to overprint. This will still succeed on CMYK. (2x on page 1)

These test files were created by the Ghent PDF Workgroup for certification of preflighting software. For more information, please visit www.gwg.org.

GWG Testfile # 98c

The goal of this testfile is:
Grayscale objects set to overprint inside trim box

Following testelements / errors are included and should be captured by the
preflighting software:

The red rectangle on the right contains a grayscale
object that lies partly inside and partly outside of the
trim box with a fill and stroke set to overprint.

When tested with the MagazineAds_1v4, following errors & warnings are found by the
reference software (Enfocus Pitstop).
